SITE "Colony Lakes - Colony Lake"

Comments:

The lake supports dense patches of low growing Nitella scattered throughout the lake basin. The Nitella is a rooted algae and is very beneficial for the lake. One of the reasons the lake water is so clear is due to this plant. The lake looks good. There were no treatments required on this visit.

SITE "Colony Lakes - Timber Lake"

Comments:

The lake supports dense amounts of low growing Nitella scattered throughout the lake. The horned pondweed is primarily in the north portion of the lake in moderate densities, and scattered along the shoreline in varying densities sparse to moderate. A treatment was performed for the control of the horned pondweed.
